# BE CRITICAL

## PROBLEM

### TODAY'S SOLUTION

Cleaning processes have to face a lot of challenges today: Different industries have different requirements, from offering a place to feel home to being sanitized. **Today's solutions are not able to fulfill these requirements and clean in appropriate way!**

#### WATER

› Water **costs** can dramatically increase in your cleaning process and are a **burden for the environment**. You also lose time through the drying afterwards!

#### CHEMICALS

› Beside the **fix costs** as you always have to rebuy your needed chemicals, cleaning with them will bring on **lasting health problems** for the user!

#### VACUUM

› Dirty **filters** with colonies of germs and bacteria that are uneasy and unpleasant to change. Furthermore the **bad odor** triggered through the filter and dirty exit air!

#### MOP

› **Germs and bacteria** live and grow in mop and buckets!

› **HEALTH – SAFETY – SANITIZING**  
IS AN EVER GROWING NEED

# BE CRITICAL

## PROBLEM

### WHY A NEW CLEANING SOLUTION?

In health care, it needs to be hygienically clean. More sanitation is required at public touch points.

Much more efficient and effectiveness cleaning solution wanted from restaurants, hotels, etc.

Deep sanitation is required at public buildings, schools, gyms, etc.

## > REDUCE CROSS CONTAMINATION!

Priority of today's food industry and shops? No contamination - Safety and Sanitation.

Faster and better cleaning in public transportations.

Searching for much more efficient and cost less cleaning with better result.
