# Time. Money. Performance.

## Clear Advantages

### Efficient cleaning

Steam clean and vacuum with one machine

### Low operating costs

No chemicals, cleaning agents or additional tools required

### 60% faster

Clean all surfaces with just one unit

### 93% less water

Use much less when compared to conventional cleaning methods

### Consistent cleaning power

Clean, hot, dry steam powers through the toughest soils

### HACCP-Certified devices

The solution for professional cleaning in an HACCP environment

### Sanitation

Proven germ reduction by up to 99.9%

## Multiple Benefits

Use the Blue Evolution to increase efficiency in your facility. Its innovative design, steam generation and vacuum technology combine to provide a powerful cleaning tool that is unmatched in performance when compared to anything else on the market.

Blue Evolution machines are truly in a class of their own. Provide your staff and management with the tools to improve efficiency and cleaning ability.

The **Blue Evolution** formula for success is very simple:  
**"Produce better results in less time".**

# BlueEvolution

## The Evolution of Commercial Cleaning

### Complete Cleaning Power

The Blue Evolution is the ideal cleaner for your business. With high levels of steam output, steam pressure and temperature, plus a powerful vacuum - the Blue Evolution can keep cleaning long after other cleaners have given up. Our innovative machine features a robust stainless steel housing, four freely-moving and lockable casters, a patented UV-C light filtration system and a full on-board kit of tools & accessories to tackle any job.

THE BLUE EVOLUTION:

# S+

120V / 220V

THE BLUE EVOLUTION:

# XL+

480V

### S+: True Power for Tight Spaces

The Blue Evolution S+ is slightly smaller than big brother XL+ but thanks to its reduced dimensions the Blue Evolution S+ shines whenever true cleaning power is needed in tight spaces.

With a steam pressure of 116 PSI and a steam temperature of 347°F the Blue Evolution S+ has plenty of power. And by using only tap water to clean and sanitize it's one of the most Eco-Friendly cleaning machines in the world.

# Power on Wheels

## Strong Tools - Strong Performance

### Accessories box

With the Blue Evolution you have everything at hand. Nozzles and brush attachments are stored in a well-designed accessories box. Convenience and power to go!

### Water Filter & Blue UV-C Light

The water filter of the Blue Evolution models use a UV-C light to kill germs during the filtration cycle. This patented process is included standard on both models at no extra charge.

### Control Panel & Display

The large, clear display of the Blue Evolution ensures full operational control. The user can check the display with a quick glance to view the current status of the machine.

### Water level display

All Blue Evolution models are continuously refillable during operation. But the water level display integrated in the housing of the Blue Evolution XL+ means users can see the current water level at a glance. This makes the timing of refills between water sources much easier when using the machines in larger facilities.

# Environment

## Green Cleaning

### Steam for a Better Clean

When the Blue Evolution cleaning system was introduced, it became obvious that professional steam cleaning instantly evolved. Our innovative and HACCP-certified Blue Evolution models featuring the Blue Evolution XL+ and the S+ deliver increased efficiency at the highest levels of cleanliness and hygiene - without using chemicals and other cleaning agents.

## Green Cleaning Naturally

Our multi-functional steam cleaner uses only tap water. This means users not only save on the cost of cleaning agents, but also protect the environment by eliminating the use of chemicals.

Water consumption is reduced by around 93 % compared to conventional cleaning with buckets and cloths. This is

### Stainless Steel

With the robust stainless steel housing and its solid rounded all stainless steel front, the Blue Evolution's solid design means shock-resistance, stability and longevity.

### It's Got The Moves

Large, freely moving casters make the Blue Evolution mobile, flexible and easy to push. The front casters can be locked using the foot activated wheel locks. The rear casters can be locked into the straight position or can be left to rotate with the front wheels allowing for easy sideways movement.

# Sanitize

Full Power with Environmental Responsibility

The Blue Evolution is kinder to the environment than almost any other cleaning system. It uses only tap water and minimizes water consumption thanks to the nature of steam. There is no need to use harmful or aggressive chemicals.

The Blue Evolution really shines when used in areas of high public traffic. Large areas can be cleaned efficiently and quickly with minimal effort. The Blue Evolution is certified for use in the HACCP environment, guaranteeing hygienically clean results.

Pathogens don't stand a chance!

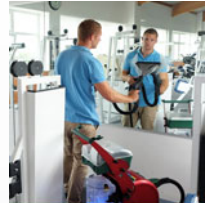

# The Evolution of Clean

## For All Applications

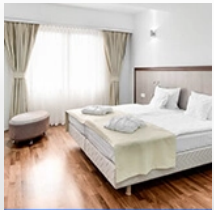

### Hospitals

- Wheelchairs
- Patient Beds
- Floors

### Fitness Centers

- Equipment
- Lockers
- Showers

### Hotel / Motel

- Hallways
- Bathrooms
- Entrances

### Restaurants

- Front & Back of House
- Bathrooms & Lobbies
- Food Prep Surfaces

### Assisted Living Facilities

- Dining Areas
- Gyms
- Hallways

### Schools / Daycare

- Toys
- Bathrooms
- Playmats

### Cafeteria's

- Tables
- Food Prep Areas
- Ovens / Stoves

### Bathrooms

- Sinks
- Mirrors
- Toilets

## HACCP Qualification = Certified Cleaning Power

Proper use of the Blue Evolution reduces the chances of spreading infection in labs, medical practices, food service areas and public facilities.
